EXPERIENCE

1st Sem'14: Creating game with JAVA

When I was a 2nd year student I and my friend had created a simple game using JAVA in a project as a project assignment of Programming Methodology.

2nd Sem'15: System analysis & design with Database project (current in progress)

Creating an Appointment management system and medical recording system (OPD system). It's a web application in collaboration with digestive system clinic, Chulalongkorn hospital, part of Chulalongkorn medical school.

2nd Sem'15: Individual study project(Networking)

Studying about Software-Defined Network(SDN) and creating simple topology of SDN using virtual software switches and network emulator

Summer'16: Summer internship at Telecom Bretagne, France

In summer 2016, I and my friend had created a prototype of mobile application(Android) for suicide prevention and mental health patients during 2 months internship at Telecom Bretagne, Plouzane, France
